Abstract

This document is the separate title page for the manuscript submitted to the *Journal of Cryptography and Steganography*. It provides the complete author list, affiliations, corresponding-author details, and the full CRediT (Contributor Roles Taxonomy) contribution statement. The scientific content of the manuscript is presented in the accompanying main document.

Keywords: post-quantum cryptography, learning with errors, threshold secret sharing, image steganography

---

CRediT authorship contribution statement

First A. Author: Conceptualization, Methodology, Software, Investigation, Formal analysis, Writing – original draft, Visualization. **Second B. Coauthor:** Validation, Data curation, Writing – review & editing. **Third C. Coauthor:** Formal analysis, Resources, Supervision, Project administration, Funding acquisition.

---

*Corresponding author.

Corresponding author

First A. Author, Department of Computer Science, Example University, 1 University Avenue, City, 00000, Country. E-mail: `first.author@example.edu`. ORCID: 0000-0000-0000-0000 [placeholder].

Declaration of competing interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Data availability

The source code, parameter set, embedding routines, and benchmark harness that support the findings of this study are available from the corresponding author upon reasonable request.

Funding

This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.
